

Industry / Customer Highlights

- Industry: Life Sciences (Pharmacy/Chemicals)
- Products and services: Research & development and production of Cholesterol and Vitamin D products
- Type of Customer: Mid-Size Enterprise

Challenges and Opportunities

To comply with FDA regulations

Existing Environment

Legacy system (SAGE)

Implementation Highlights

Complex implementation attained within 11 weeks.

Why SAP?

SAP—in its present form, running in the veins of small, mid to large companies is gaining more momentum due to its capability to fulfil niche requirements with the power of Cloud. The spectrum of SAP products is not only allowing companies to manage and optimize businesses but is also proving to be an integral part of their information systems architecture.

SAP is:

- Integrated solution for almost every business critical process
- Transparency
- Ability to harmonise processes
- Flexibility and scalability
- Provides consistent data that can be rapidly consolidated
- Fewer interfaces
- Allows for world-wide differences in regulation and legislation

Benefits

- Data: accurate and consistent
- Reports: anytime, clear and manageable
- Savings: time and cost
- Minimum risk: reduced manual operations and paperwork, minimising errors and the risk of data loss
- Minimum interfaces: fewer required for information exchange
- Compliance: with exacting FDA regulations

About the Customer/Implementation

Through the successful roll-out of SAP Business All-in-One, one of the branches owned by client has discovered that SAP implementations need be neither 'frightening' nor 'long-lasting'. The SAP solution supports client in the Netherlands in complying with the stringent FDA regulations. It is planned the solution will be rolled out to client's other branches in the future. The Manager of the client team explains "I've been involved in other ERP implementations that took more time. However, because SAP offers the ASAP Focus method to implement the 'ERP baseline', complex and long lasting blueprints for ERP projects are no longer needed." He extends "I think an implementation time of 11 weeks says enough about the quality of SAP software, best practices and methods. Furthermore I have experienced that my teammates were very keen on making this implementation a success, because they understood immediately what added value SAP would be for the work pressure they were experiencing before the implementation. The most heard reaction on the production floor: 'This was a cool project.' My team people were doing overtime without complaining whatsoever. It really was a smooth operation. The management didn't have any worries about this ERP project. Just because they were keen on using the extra functionality SAP offered them as soon as possible."

About V3iT

V3iT Consulting, Inc. provides FIXED COST SERVICES with Guaranteed SLA for SAP BW and Business Suite for HANA Migrations, SAP Simple Finance enablement, SAP cloud deployment for non-prod systems, SAP FIORI / Personas deployments and support, SAP Migrations to cloud and hybrid (cloud/on-prem) deployments, SAP HANA / BOBJ/ Predictive Analytics deployments and support, SAP AMS Support, SAP Implementations, and IOE Deployments.

Market Differentiators: V3iT is the only SAP partner providing FIXED COST implementation, migrations, and support services to SAP customers and has been instrumental in successfully demonstrating this for the past 15 years.

Competitive Positioning: With our 100 SAP certified Consultants and being an education partner in India and services partner in USA, our onshore-offshore presence along with alliances with data centers makes us perfectly aligned to becoming a one-stop solution provider for all customer needs in the small and medium size customers. V3iT is SAP VAR for ERP (BAIO), HANA and Analytics. We are also on GSA schedule-70 and serve various Federal agencies and Federal government.
