

# V3iT® TEAMS™ CLOUD

Software-Defined Infrastructure  
Software-Defined WAN  
Software-Defined-Data Center  
Application Managed Services  
IT As a Utility Service

Simplifying IT Services at a **Velocity**, with a clear **Vision** and a quick **Value**

# COMPLETE AND COMPREHENSIVE CLOUD

## CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

**More\_Flexibility** with a full suite of colocation, managed services and elastic hosting options from multiple Tier III data centers

**More\_Agility** to provide tailored designs and service delivery in dramatically less time than other SAP providers

**More\_ROI** with smart solutions designed to maximize data center space and optimize your IT investment costs

**Dedicated** to SAP Infrastructure and SAP ecosystem support including 3rd party software and other enterprise software

**Support** for all the software and applications right from soup to nuts as you want

**No-Cost, No-obligation** Proof of concept prior to full deployment

## flexible solutions for your business needs

### TECHNOLOGY CONSULTING PROVIDES A TOTAL END TO END IT AS A UTILITY SERVICE

#### APPLICATION MANAGED SERVICES

Most Hosting Providers will support only to the OS stack or up until the SAP Basis Support Services. We provide all services that include till the application layer.

Backed by people who have been doing this as a profession since the early 1990's this clearly an edge over the other providers.

Or simply put it, you have an ability to tap in our TEAMS experience to know for example, what is the best way of doing this in S/4 and is IFRS the best way or should I report real-time in BW or keep SCM-BE segregated for demand planning, should I do it in ERP or S/4 real-time now that I have it on SAP HANA or should I deploy a FIORI strategy in parallel with Personas while keeping my portals intact, how do I actually know the new ROAMBI features in Business objects and many more.

- Design Thinking included as a part of the optional service
- Support for multiple browsers and devices as an optional part of the service
- Support for applications by personnel who have been supporting over a hundred global implementations for the past 25+ years
- Support for ABAP/4 as a procedural language, object oriented and also on Eclipse
- Support for FIORI apps as well as DOT NET apps developed natively and deployed via the SAP Gateway and many many more ...

## STATE OF THE ART DATA CENTERS

- TIER III DATA CENTER FACILITIES.
- GO-GREEN DATA CENTERS.
- N+1 COOLING/ POWER INFRASTRUCTURE.
- REDUNTANT BLENDED NETWORKS
- ULTRA SONIC HUMIDIFICATION
- AC AND DC POWER CAPABILITY
- 24X7X365 ON-SITE STAFFED
- CONVERGED COMPUTE
- SSD AND NVRAM FOR STORAGE
- INFINIBAND NETWORK BANDWIDTHS
- MANAGED FIREWALLS
- MANAGED VPN
- DEDICATED PRIVATE CLOUD
- PUBLIC CLOUD
- HYBRID CLOUD
- SOLUTIONS DEFINED FOR SAP
- SOLUTIONS CERTIFIED BY SAP
- SUPPORT 3RD PARTY SOFTWARE
- SUPPORT NON-SAP SOFTWARE

## REAL-TIME MONITORING

Included as part of your solution is measuring and guaranteeing vital performance metrics such as total average response time below sub-second, but also measuring and monitoring business KPIs as required.

## GUARANTEED—SLA

Comprehensive SLA that spells out all the metrics in black and white on the contract and with stiff penalties if we don't achieve our SLA— the risk and onus is all on us while you get the peace of mind.

## SECURITY IS PARAMOUNT

SSL, encryption at all levels of the data through to your enterprise is critical and more-so these days than ever before. We have guarantees put in place as we embark the SD-WAN which helps us put the new standards in place as well as ensure their compliance at all times.

## EASE INTO OUR ENTERPRISE MANAGEMENT SERVICES

Start with a comprehensive no-cost, no-obligation POC. Move your production only

if you are comfortable, else keep it hybrid cloud to begin with.

## FIXED COST NO SURPRISES

This has been our philosophy all through out. We never charge you a dime extra for a service we promise, we have a optimized cost structure spelt out and that stays constant as long as you stay within a given % of error of margin of planned growth.

We start our service with a small questionnaire that is online on our website. You fill in that within less than 5 minutes or so and we give you a comprehensive quote. We have done it so many times, that it is now down to a science, not an art anymore.

We want you to get used to the new norm. Some of our philosophies include:

- Once a customer, a customer forever
- No wonder, that we have been fortunate to be of service to fortune 500 companies that we started with over 10 years back still retain us as trusted partners
- We can resell SAP software, so you want to deploy another software, we can deploy it and be a one-shop-stop (in addition we do resell other software as well).
- We can also blend in all of the solution as a OPEX solution, saves you on expending CAPEX at any point-in-time, all as one single monthly installment.

See what some of our customers are saying about us and our services

“We have seen marked improvement in payroll performance. We dump information from workforce 10am on mon - usually prior to migration, the payroll team used to work overtime and end at 10pm on every Monday after migration they can get away @ 4.30, partially attributed to the wise thinking of clean-up of simulation runs, prior to the migration” - Director of Payroll at a Public Sector Organization

“We have given our SAP R3 Basis ownership to V3iT Inc Naperville for last 3 years & are very happy with the services and the value provided by them. We have known Deepak Padgaonkar the CTO of V3iT for last 4-5years and worked with him on multiple SAP projects. They have done multiple upgrades and hardware migrations for us since 2008 , in R3, BW, Oracle. V3iT also monitors our BW landscape for data-load failure and we are happy with the services provided. The response time of the Team members is amazing. Any time of day or night, they have responded within minutes to job failures or database issues.

Most recently they delivered Enhancement pack upgrade (to EHP6). The team did a excellent job ! Deepak was himself involved in the project to make sure that the upgrade went as planned and to our satisfaction. V3iT Basis team associates Satish Divekar, Rufus Selvaraj and Akshay Pandit did a excellent job.” Manager and CIO of a Aerospace Company

Simplifying IT Services at a **Velocity**, with a clear **Vision** and a quick **Value**
